### **DETAILED ACTION**

1. This office action is responsive to amendment filed on 04/28/2008.

#### ***Response to Amendment***

2. The Examiner has acknowledged the amended claims 1, 7, 13, 17, and 21. The 35 U.S.C. 101 rejection has been withdrawn based on the amended claims. The double patenting rejection is still maintained since a Terminal Disclaimer has not been filed to overcome such rejection.

#### ***Response to Arguments***

3. Applicant's arguments filed on 04/28/2008 have been fully considered but they are not persuasive.

#### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

Art Unit: 2157

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1 – 28 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 - 47 of copending Application No. 10/345,587 in view of Chung et al (US 20040088380; hereinafter Chung).
6. Claims 1, 22, and 36 of copending Application No. 10/345,587 claim all the limitations, except for at least one recipient node of said first group begins communicating a portion of its respective subfile that it is receiving from the first node to at least one other recipient node of said first group before the at least one recipient node fully receives its respective subfiles.
7. However, Chung teaches an analogous splitting and redundant storage on multiple servers, wherein at least one recipient node of said first group begins communicating a portion of its respective subfile that it is receiving from the first node to at least one other recipient node of said first group before the at least one recipient node fully receives its respective subfiles (paragraphs [0008 – 0009], and [0016]).

Art Unit: 2157

8. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teachings of the instant application by incorporating the idea of having at least one recipient node of said first group begins communicating a portion of its respective subfile that it is receiving from the first node to at least one other recipient node of said first group before the at least one recipient node fully receives its respective subfiles as evidenced by Zayas for the purpose of speeding up the delivery of data stored in files to users, thereby improving reliability, availability, local autonomy, load balancing, and increasing the rate at which data can be delivered.

9. Claims 2 - 16, 18 - 20, and 22 - 28 of the instant application are the same as claims 2 - 21, 23 - 35, and 37 - 47 copending Application No. 10/619,737.

This is a provisional obviousness-type double patenting rejection.
